

**LISTEN. LEARN. EXECUTE.**

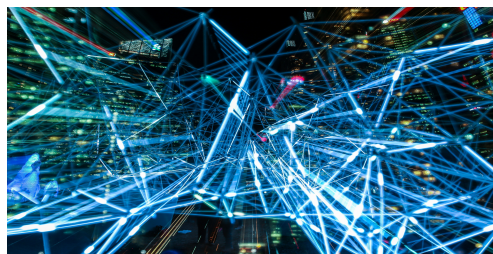

**CONSULTING, PROJECT MANAGEMENT, VALUE ENGINEERING,  
EDUCATION, PROGRAMMING, DEVELOPMENT, ENGINEERED IT SOLUTIONS,  
IBM and ERP Upgrades, CLOUDSOLUTIONS**

With the rapidly changing and complex nature of business technology, even the most talented IT departments can feel the pressure of keeping up to date. ISE offers a full suite of services to help improve your business, upgrade your enterprise architecture, provide migration services, develop custom applications, and manage all of it with our proven management methodologies.

**Project Management**

We provide highly experienced project managers with the leadership necessary to successfully guide, manage, and support your initiatives. Our methodology is based on years of experience in refining and improving the steps which constitute implementation best practices, as well as Project Management Institute (PMI) and Project Management Body of Knowledge (PMBOK) standards.

**Engineering IT Solutions**

As your business grows in size and sophistication, your IT infrastructure needs to keep pace. What worked a few years ago won't deliver the performance, reliability and security you need today. Nor will it deliver the information access and collaboration features that today's workers require. With the right enterprise architecture, you can support the speed, reliability and security your organization requires.
