Job Description

ROLE AND RESPONSIBILITIES

We are seeking a Manufacturing Execution System (MES) Consultant responsible for providing education, consulting, and implementation services on our MV2 shop-floor application. You must have experience in manufacturing business processes – production execution, production scheduling, warehouse management, as well as a proven history developing long-term customer relationships. This position reports to the Director of Customer Success.

- Execute and implement project plans for MV2 shop-floor products
- Perform and document on site assessments, discoveries, and client roadmaps
- Provide onsite and remote end-user training
- Have considerable client interaction
- Analyze and recommend solutions for complex manufacturing issues
- Provide manufacturing business process analysis and modeling
- Perform test plan development as well as system testing
- Assist in the development and execution of marketing and customer success activities
- Assist in the development of education materials

QUALIFICATIONS AND EDUCATION REQUIREMENTS

- An undergraduate degree in a field such as Computer Science, Business, Supply Chain, and/or equivalent work experience
- Experience conducting software training and implementations
- Able to travel extensively
- Excellent oral and written communication skills
- Ability to think strategically for global optimized solutions across all areas in the client organization
- Ability to work and make decisions independently
- Eagerness to take initiative in learning and applying new skills

PREFERRED SKILLS

- Experience with ERP (Infor XA, SAP, Dynamics 365 F&O) systems desired
- Knowledge in MANUFACTURING and/or SUPPLY CHAIN modules
- Competency in Microsoft Office applications and collaboration tools like Word, EXCEL, PowerPoint, SharePoint, Teams
- Self-starter with high motivation and passion to thrive & adopt in an ever-changing, fast-paced environment
