

ISE | Professional Services

A certified channel partner for both IBM® and Infor®

A certification held only by a few channel partners throughout the world

We have sold, installed and supported AS/400 and IBM Power Solutions for over 30 years.

ISE has implemented IBM Power and Infor XA systems coast-to-coast throughout North America.

Our professional services provides a full suite of solutions including hardware and operating systems upgrades, application migration, system consolidations, partitioning, HA & DR solutions and cloud migrations

IBM, Infor and ISE have a long strategic partnership that continues to provide the best services and support available to our customers.

Contact us today to learn how to streamline your systems' performance and reduce on-site IT loads.

INFORMATION SYSTEMS ENGINEERING, INC.

Connecting your business to the solutions you need

Leveraging over 30 years in the technology industry focused on discrete manufacturing, we know how to provide an accurate representation on whether our core competencies can meet your business needs.

We will always openly and honestly discuss your requirements against our ability to provide solutions. We believe our approach differentiates ISE from other providers, and allows us to focus on your business requirements to provide real solutions that will meet your needs and speak your language.

OUR PEOPLE: OUR BIGGEST ASSET

ISE has many strengths but our biggest is our people. Our team enjoys the customers they work with. The result is a longstanding relationship between ISE and you. Our employees have a broad range of skills to offer; from software developers to senior business consultants and project managers.

OUR PRODUCTS: BEST-IN-CLASS TECHNOLOGY

Since our founding in 1984 we have continued to source IBM hardware, Paper-Less MES and ERP software products. ISE is both an IBM Business Partner and Infor Gold Channel Partner. These solutions combined with our expertise bring value when partnered with your internal resources. Together we can achieve superior results.

"Sierra Pacific Industries enlisted help from ISE in 2017-18 on an iSeries Power 8 upgrade. ISE worked closely with our team from configuring the order through installation and full implementation of the new system. ISE successfully addressed multiple challenges including: our limited knowledge of XA, considerable customized code, and a significant number of software upgrades rolled in one. ISE's superior IBM iSeries expertise combined with their knowledge of the intricacies of Infor XA helped to streamline a complicated migration strategy. I have personally been involved with IBM iSeries since originally announced in 1988, supervising many hardware and software upgrades, and through it all I've never worked with a better partner than ISE..."

~Steve Gaston, CIO, Sierra Pacific Industries
