

ISE | Professional Services

Connecting Your Business to the Solutions You Need

Get the expertise and resources needed to take advantage of tomorrow's digital technologies today.

ISE wants to change the way you communicate with your technology provider. With our expertise and solutions, we can align our contributions to meet your business needs.

We know how to talk to shop floor personnel, to IT staff and to the C-Suite. We know how to ask the right questions, make suggestions and produce results at each level in a way that matters to each stakeholder.

Consulting Solutions Services

With analytics, mobile, IoT, cloud, on-premise and mission-critical applications to manage, even the most talented IT departments can feel the pressure of keeping up with the rapidly changing technologies of today.

With over 35 years of experience, our consultants can help improve your business processes, take advantage of your business systems investment, upgrade your enterprise architecture, provide migration services, develop custom applications and manage all of it with our proven project management methodologies.

Leveraging over 30 years in the technology industry focused on discrete manufacturing, we know how to provide an accurate representation on whether our core competencies can meet your business needs.

We will always openly and honestly discuss your requirements against our ability to provide solutions. We believe our approach differentiates ISE from other providers, and allows us to focus on your business requirements to provide real solutions that will meet your needs and speak your language.

Our People are Our Biggest Asset

ISE has many strengths but our biggest is our people. Our team enjoys the customers they work with. The result is a longstanding relationship between ISE and you. Our employees have a broad range of skills to offer; from software developers to senior business consultants and project managers.

Our Products are Best-in-Class Technology

Since our founding in 1984 we have continued to source IBM hardware, Paper-Less MES and ERP software products. ISE is both an IBM Business Partner and Infor Gold Channel Partner. These solutions combined with our expertise bring value when partnered with your internal resources. Together we can achieve superior results.

SHIFTING THE MES PARADIGM

Paper-Less, LLC is a wholly owned subsidiary of ISE specializing in the design and development of a manufacturing execution system called Paper-Less MV2. Traditional ERP solutions fall short of meeting the requirements on the manufacturing floor. Our Paper-Less product can solve that.

Contact ISE today to learn about how we can help reduce load on internal IT departments and keep your business systems running effectively.
