

# MANUFACTURING EXECUTION SYSTEM

## MV2 Business Benefits

Moving to production management with an MES system offers a number of benefits. MV2, our MES solution combines these with the next-level features below:

### **ALWAYS ON PERFORMANCE MONITORING**

Manufacturing 24/7... then your MES should be "Always On." MV2 allows constant communication, and real-time shop floor information regardless of ERP status.

### **HYBRID CLOUD CAPABLE**

MV2 allows flexibility in your Cloud strategy, supporting both Cloud and On-Prem deployments.

### **IIoT INTEGRATION ABILITY**

MV2 positions you to take advantage of IIoT, improving communication and real-time information to & from your machines without human interaction.

### **MODULAR SYSTEM DESIGN**

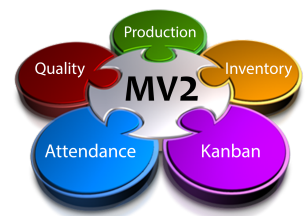

Have it your way... select the applications you need to accomplish current demands, and add more functionality as your goals or needs require.

### **BUILT FOR SCALABILITY**

Small or Large, Single or Multiple sites; MV2 gives you flexibility to expand your MES solution as your business grows.

### **ERP PORTABILITY**

MV2 insures your shop floor solution stays with your shop floor, withstanding changes to ERP, proprietary software, or any external influence preventing you from maintaining your chosen direction.

Contact us today to learn how our MV2 manufacturing execution system and its extension modules can advance the production abilities of your manufacturing operation.
